OFFICE: No. 15 Quincy Street.

SATURDAY, FEB. 25, 1871. Legislative Figuring --- The Deficit. In this paper may be found the full text of the Report made by the Finance Committees of the Legislature touching the deficit in the treasury. It will be seen that we had correctly anticipated the main facts exhibited in it. With the document now before our readers, some examination of it may not be untimely, in view of the partisan use for which it has evi dently been prepared.

The Committees claim that the Governor's message and Auditor's report are calculated to mislead the public in regard the condition of the treasury. The Gov-ERNOR, we believe, simply presented the igures as he found them in the report of the Auditon. There is certainly no obscurity in that report. The Committees complain that the Auditon did not separate the balances due to the different funds, and in that particular, which is the only one specified, the report is "calculated to mislead." There are but two school funds, and

both these are fully exhibited in the Auditor's report. The balance due the permanent fund is shown to be \$25,560 17, while the balance due both is \$60,528 34. The simple subtraction of the former from | be the latter, would, therefore show the balance due the distributable fund; but the legislative mind not being equal to that much arithmetic, it was necessary to call on the Auditor to make the subtraction legislative comprehension.

The committees, quoting from the Au ditors report, show that at the commencement of the present fiscal year (Oct. 1, 1870,) the general treasury was indebted to the school funds \$60,528 34, and correctly call this "the actual deficit." Then they take the Auditor's statement that at that time there were balances of appropriations unpaid amounting to \$32,
023 82. They add what had not been
paid to what had, and call that "the actual
deficit;" which it is not. Then they say
these unpaid balances are payable during the current year, and they count them case his client is defeated. In this counas part of the obligations that try it is the client, not the lawyer, who have to be appropriated for, when in fact payment of them is stopped not only by the act making the appropriations (which forbid any payment on them after the lat of March, 1871,) but by the appropriation bill of the present session, prepared and reported by these same Kinance Committees whose report we are discussing. That the suppositions that the numerical balances of reply. bill provides that the unpaid balances of reply, all appropriations made before the meeting of this Legislature shall revert to the treasury, in other words that payment of

the year "with a balance against us which one side and intensely Democratic on the must be supplied by taxation amounting to the large sum of \$92,532 16," counting as money actually paid out the thirtytwo thousand which had not been paid out, and which the Committees are taking care to provide shall not be paid out. Is this an attempt at deception, or is it only an inability on the part of the Committees to understand a very simple fact? Two errors result from it. The public will believe that they have to proride for a deficit of ninety-two thous when it is but sixty thousand. Then pro provide for current expenses, they estimate for a deficit at the end of the year of twenty-two thousand, and thus they reserve a margin of \$32,000 unappropriated funds to come and go on.

The registration expenses which are es pecially pointed out as helping to create the deficiency amounted during the year in the whole State, to the enormous sum There is another feature of this repor

that we may refer to hereafter.

IT is thought Mr. SUMNER will not be able to resume his seat this session. His wide spread anxiety. He has borne such a prominent part in the great events which have marked the history of this country during the last decade : his geniuhas shown so brightly in spite of the fog of calumny through which it had to struggle; his integrity in the midst of corrupt surroundings has been so firm and his services so valuable and sincere that his loss would be generally recog nized as a national calamity.

Ir is seldom a more pathetic tale is told than that related on the fourth page this morning by our machine poet. If his "Charge of the Cat Brigade" delighted the hero of it, as we hear it did, then this sad and truthful recital ought to bring tears to the eyes of the stoniest Early Rose potato and melt the flintiest hearted Patent Reversable Griddle, "If you have tears, prepare to shed them now.

Ir is ascertained that there are fifteen cases of contested elections in the next Congress, with a probability of two or three more to come from States which have not yet elected. This da's decided improvement over the present Congress which had over thirty contests in the

Ir is a fair inference from the letter of our "Charleston" correspondent, published yesterday, detailing the amatory adventures of a Democratic member of the Lagislature said to hall from this part of the State, that "black preferred" is the rule down there as well as here.

On the coldest day of the winter, January 24th, two lades of North Anson, Maine, went a mile into the woods, got a load of wood, hauled it to a school house, unloaded it, and got some boys to cat enough to make a lire so as to have a pressure meeting.

The passage of the Southern Pacific Railroad bill, to-day, is an important event in the history of railroad and in-dustrial progress on this continent. Less than two years ago the completion of the first railroad to the distant Facilic Ocean was celebrated by wondering people who could scarcely realize that the sphere of their commercial relations had been so greatly enlarged, and already we have two roads in prospective. Within three years Portland, Oregon, and San Diego, California. will seem as near, and almost as important, points in our commercia polity as San Francisco. The main line of the newly-chartered road will be near polity as San Francisco. The main line of the newly-chartered road will be nearly along the 33d parallel of latitude, and will run through Western Texas, Southern New Mexico, Southern Arizona, and into Southern California. Along the greater portion of this route it will be in the nieghborhood of 300 miles south of the present Union and Control.

will be in the negation of 300 miles south of the present Union and Central Pacific lines. San Diego, which will probably be the Western terminus, is 500 miles south of San Francisco, and, as it lies more directly in the route which the Australian trade would naturally take, will probably become the competitor of the latter city at some future day for that the latter city at some future day for that branch of the trans-Pacific trade. In this connection the San Francisco Bulletin of the 14th, discussing the probability of the passage of the bill, says: "If the railroad bill gets safely through Congress, we may count it as certain that San Diego will be connected with this city, either by a railroad by the way of Visilia, San Bernardine, and Los Angeles, or by a more direct coast road, possibly by both. Parties are now in Washington for the purpose of promoting the coast road enterprise."

San Diego, however, has facilities for an important trade, and will undoubtedly become one of the principal Pacific ports of the United States. Its harbor, while on the San Francisco Bulletin o

of the United States. Its harbor, while not so magnificent as that of San Frannot so magnificent as that of can Fran-cisco, is perfectly land-looked, will admit the largest ships, and is the only safe har-bor in the 1,200 miles of coast next south of San Francisco. The country that will be traversed by the Southern Pacific Road in a supplementary report. We trust the is less known than any other part of the new auditor will take a hint and bring continent, except the northern wilderness continues are blittle down to the Democratic westward from Hudson's Bay. But what westward from Hudson's Bay. But what little is known of Southern Arizona and Southern New Mexico favors the beliet that the richest mines of the precious metals on the continent may yet be open-ed in that region. An item of no less im-portance will be the enormous supply of beef cattle which will reach the principal markets of the country from Western Texas and Mexico as soon as the road Texas and Mexico as soon as the road enetrates that fine pasturage and stock

A copy of the Fairfield (Iowa) Ledge A Cory of the Fairleid (10wa) Leager, or go fthis Legislature shall revert to the reasury, in other words that payment of hem is stopped.

Yet the Committees say that they begin

POISONOUS MEDICINES.

The theory that the virus of disease can b safely counteracted by doses of poison, is false and dangerous. Within the last twenty-five years not less than a score of virulent poisons have been added to the repository of the medical probeen added to the repository of the medical pro-fession. They are given in small doses, other-wise they would destroy life immediately; but even in minute quantities, they produce, ulti-mately, very disastrone effects. It learnwise and unphilosophical to employ as remedies, power-ful and insidious drugs, which, in subjugating one disease, sow the seeds of another still more manageable. None of these terrible medica Arsenic and quinia are given for intermittents Arsenic and quinia are given for intermittents; bromide of potassium for nervous disorders; strychnine and prussic acid for general debility; mercury, in various forms, for liver complaint; preparations of chloroform and spium for sleep-lessness; and yet these deadly drugs do not com-pare, as specifics for the diseases above cuumera-ted, with that wholesome vegetable invigorant and alterative, while they are all so pernicious that it is astonishing any physician should take the responsibility of prescribing them. Let in-valida, for their own sakes, try the Bitters be-fore they resort to the poisons. The relief they will experience from a course of the harmless specific, will render a recourse to the unsafe pr arations referred to, quite unnecessary, feb21cod
